

Requesting for Quotations from reputable suppliers - Hire of 12 Mobile Video Cinemas to cover Mafeteng, Qacha'sNek, Mahalehoek and Quthing for three Months : January 2018 - 31st March 2018.

1. Introduction

Lesotho's HIV prevalence is the second highest in the world at 25%¹. The HIV prevalence among girls aged 15-19 years is 5.4% and 4.8% for boys of the same age. By age 20, the prevalence among girls aged 15-19 years rises to 21.5% yet it only increases to 7.5% among boys of the same age. The window of opportunity to break current HIV infection cycle is to target young women between 10-19 years of age with effective SBCC interventions that would lead to adoption of HIV risk free behaviours.

As a result, the Skillshare Lesotho led consortium comprised of Skillshare Lesotho, Sesotho Media & Development (SMD) and Lesotho National Olympic Committee (LNOC) with the support from The Global Fund to Fight AIDS, Tuberculosis and Malaria promotes HIV risk reduction messages among adolescent girls and young women using SBCC interventions that involves community based film screenings, peer education sessions, condom distribution, HTS, referrals and SGBV prevention.

2. Activity Description.

As part of the project interventions package, the Skillshare Led consortium intends to show participatory documentaries on HIV drivers and risk reduction behaviors targeting adolescents aged 10-19 years. This requires mobile video cinemas to traverse the 4 target districts where adolescents will be mobilized through our community based peer educators to watch these documentaries. Skillshare will provide the documentaries and the people to facilitate the discussions during the film screenings. The service provider will make available the mobile video cinemas and their respective operators.
